POWER REQUIREMENTS

Determining the proper power requirements is crucial from the standpoint of fire hazard, safety or electrical equipment maintenance. The Electrical cords that are used at the Festival site can only handle between 1200 and 1500 watts. Too much wattage usage for a prolonged period of time can cause the insulation on the extension cords to melt. Here are some typical values for appliances (as a reference) when determining your power requirements:
CSA Approved equipment ONLY - no U.L. equipment ALLOWED

- Laptop/computer
- Printer
- Television/Monitor
- DVD/VHS Player
- Decorative Lights
- Booth Lighting – must not hamper operation of nearby booths

From these values, you can see that if two or more of these appliances are operating at the same time on the same extension cord, the circuit breaker will trip; power will be shut-off and may cause permanent damage to your equipment.

FOR ALL ELECTRICAL REQUIREMENTS – PLEASE INDICATE ANY AND ALL INFORMATION ON YOUR APPLICATION FORM!
